MAIN FEATURES

Biba is small

Smaller than you thought. But only by its size, not by its effect. Everyone notices and admires it. Its clean lines and carefully chosen shapes will enhance your space.

Create your pattern of shapes and colours

Combining shapes and colours in an endless fusion of possibilities will lead you from simple and sophisticated, to a luminaire that lets your ideas fly.

Something for your taste

The best stories happen at the table, and Biba loves to be part of that. A regressed light source and installation at the right height will offer high visual comfort with low glare. It will create a great ambient for conversations, and due to a good colour rendering, the food will be even more appetizing.

Details that make a difference

Biba is made of single aluminium piece. The transition between the power cable and the luminaire is seamless. Its substantial weight guarantees constant straight tension of the cable and pure aluminium case works as a cooling system for the lighting source.

Cable decentralizer for moving the position of the single luminaire, the cables stay taut.

MAIN FEATURES

Sometimes one simply isn't enough

Choose a cluster ceiling cup when you want to create a group of products closely together. The driver is integrated in the ceiling cup.

Cluster composition

In the case of a remote power-in position, this can be just a functional feature. But it is suitable also when you want a more dynamic composition and the cables to become part of the design. 3-7 spots can be connected to a cluster.
